CORE COMPLIANCE PLATFORM

The CORE Compliance Platform is unique online software designed to help small businesses implement an effective Quality Management System. Core is used to manage the documents, records, and processes needed to maintain ISO 9001 and related ISO standards, and also CMMC and cybersecurity compliance. ISO compliance requirements can be overwhelming at times. We understand. That's why the CORE Compliance Platform was developed as an easy-to-use application to keep your certification on track and your business running smoothly.

CORE *FEATURES*

Cloud based system, can be accessed from any location.

Core Business Solutions is ISO 9001 and 27001 Certified. So the CORE Platform benefits from the security of an internationally recognized Information Security Management System.

CORE houses ISO Management System and Cybersecurity documents in one location for easy auditing and maintenance.

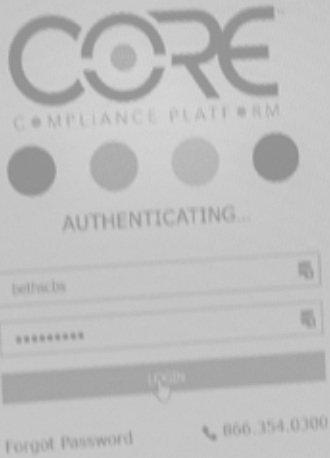

CORE provides a process for maintaining required records for compliance and risk management.

CORE works with Integrated Management Systems such as ISO 9001, ISO 14001, ISO 45001, ISO 27001 and more.

CORE manages cybersecurity compliance with a risk register, dashboards, and autogenerated reports.

CORE features a complete and customizable document and record control system.

CORE has processes and automated forms (Autoforms) to make compliance easier.

Simplifies ISO and cybersecurity preparations

Keeps you on top of ISO and cybersecurity requirements

There is nothing to install or maintain

It's flexible and fits your company's way of doing things

WHAT IS DIFFERENT ABOUT CORE?

CORE is built for compliance by ISO experts.

CORE evolves to stay current with compliance requirements.

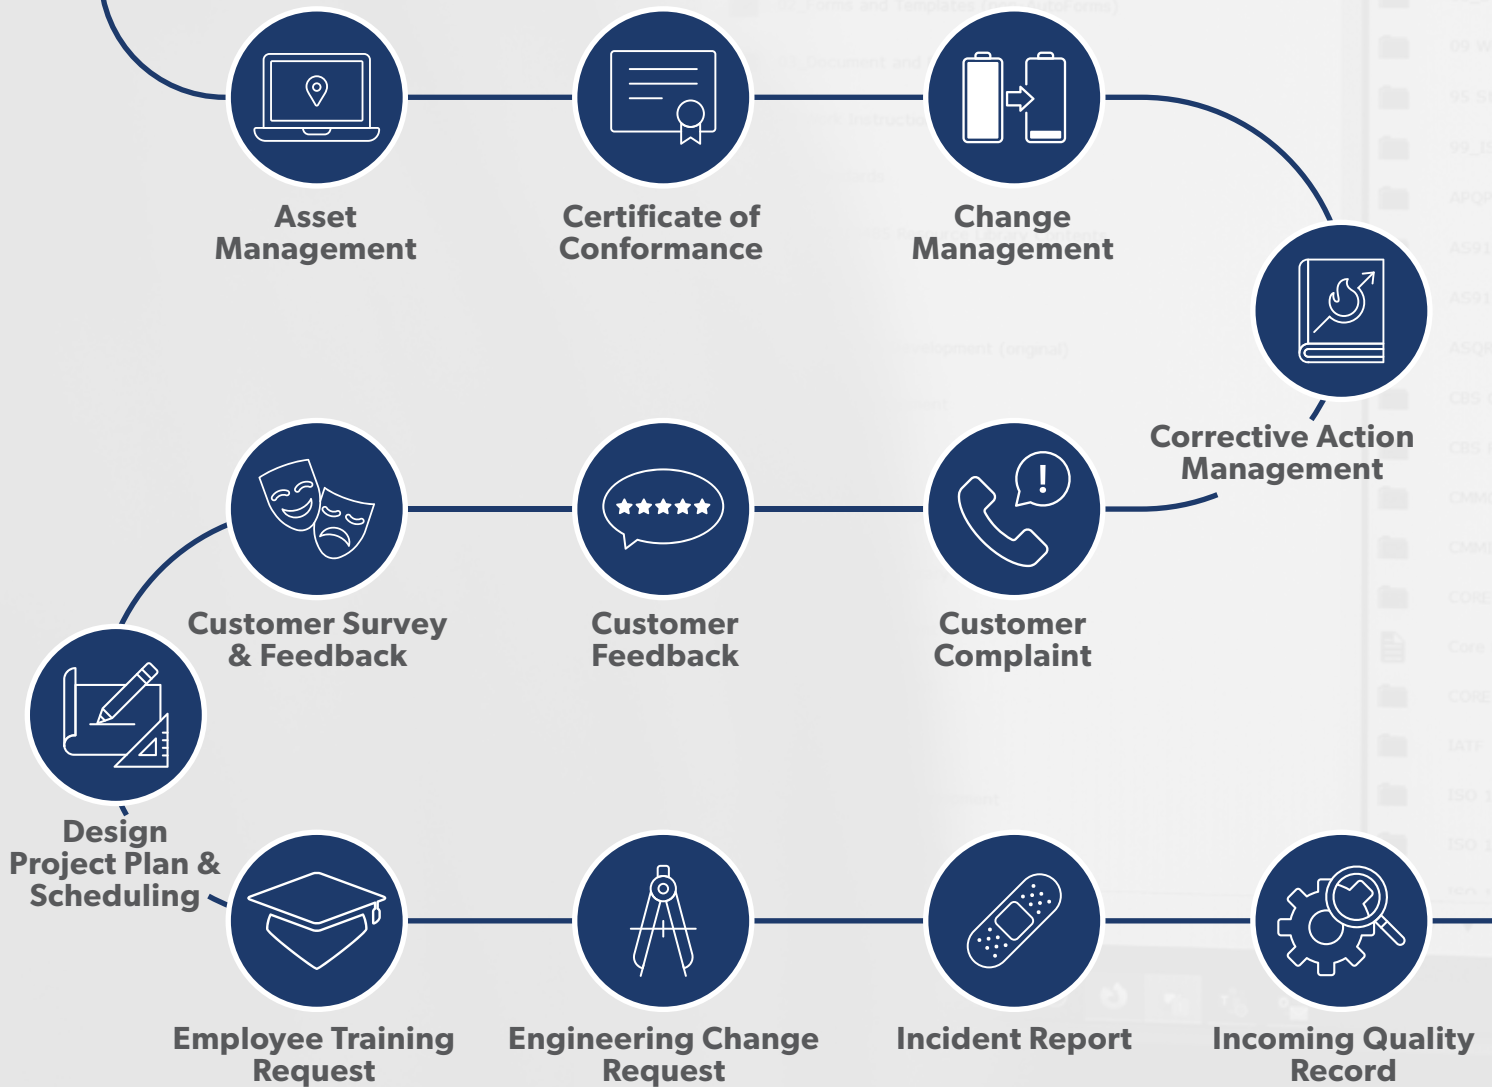

CORE is intuitive and easy to navigate.

CORE is easily tailored to customer needs.

CORE provides dedicated, personal customer support and comprehensive user training.

CORE AUTOFORMS

The CORE Compliance Platform started as a document control software 20 years ago. However, it has evolved into hosting many forms and templates to manage ISO and Cybersecurity Compliance. CORE provides autoforms along with the following features for maintaining ISO compliance:

Medical Device File

Meeting Agenda & Minutes Management

Nonconformance Management

Objective & KPI Tracking Form

Opportunity for Improvement

Return Material Authorization

Preventive Maintenance

Purchase Requisition

Risk Register

Security Change Log

Security Incident Management

Supplier Corrective Action Management

Supplier Evaluation

Tool & Equipment Calibration

Ticket Report

Supplier Qualification

Depending on the certifications you are seeking and trying to maintain, your CORE platform is equipped with the forms you will need so we don't bog you down with ones you will not use. If you add a new certification, we can easily add other forms to your account as we call it, so you continue to have everything you need to maintain compliance.

Complete user training is included within the system. We also have live chat and a robust live customer support team to assist you with anything you are trying to accomplish within CORE.

CORE SECURITY SUITE

Our online platform gives you all the tools you need for ongoing cybersecurity, including:

- Document and record control
- User-friendly project dashboards
- Incident management
- Security change logs
- Risk register
- Asset management

We also provide standard-specific tools depending on your security requirements. For companies who require NIST/CMMC, we provide a simple SSP tool, an automated SPRS score calculator, and customizable policy templates crafted by our own CMMC experts.

VALUE TO YOU

Helps your team know when an action is needed

User security allows for multiple levels of security & access

Easy access to real-time information

One stop shop for audits

CORE SECURITY

CORE Platform Application Security

- Password aging & selection rules on length & complexity
- Session timeouts that enforce logout
- Multiple authority levels for users
- Group privacy settings

Server & Network Security

- Encrypted using TLS v1.2 or higher (https)
- Regular security audits
- Hosted on Amazon Web Service (AWS) GovCloud
- Core security and systems admin staff are on call 24x7x365
- A copy of the CORE Security Document is available upon request

KEY FEATURES & BENEFITS

- Intuitive to use, flexible
- Reports, dashboards, and data analysis
- Hosted on AWS GovCloud, accessed through your browser
- Customizable Autoforms & apps
- Access controlled based on roles
- Secure, stable, with industry standard TLS and SSH encryption

TRAINING & *RESOURCES*

ONLINE E-LEARNING TRAINING COURSES

To help you quickly learn the ISO 9001 (or whatever standard you are seeking) requirements and to help you be well prepared for the Registrar's audit, all program options include training for the Management Representatives, Top Management, and Internal Auditors. We also provide an introductory video for all employees. Since they are online, they can be viewed from anywhere and at any time convenient for you.

Interactive learning and video-based training modules make it easy to learn and apply what you have learned. Once you are through the training, you'll be an ISO expert in no time. Certificates may be issued for learners who complete their training.

ISO & CYBERSECURITY RESOURCE LIBRARY

To help you complete, maintain, and improve your ISO management system and your certification, you will have access to the CORE Resource Library. This library includes templates, sample documents, training, checklists, and other tools to simplify the implementation of ISO 9001 (and related standards).

CORE's Resource Library houses templates for cybersecurity policies, procedures and document plans as well.

The CORE Compliance Platform is available for the first six months of all our Consulting Programs free of charge, so you get to experience it before you sign up for a subscription. With all our consulting programs, we provide online on-demand training courses and resources so that we transfer the ISO knowledge to you and your organization, so that you can successfully implement and maintain your certification for many years. If you subscribe to CORE after your consulting project is complete, you will still have access to our learning center and resource library.

If you'd like a demonstration of the CORE Compliance Platform, the CORE Learning Center, or the Resource Library, we will be glad to show you the resources and tools you will have available.

Email info@thecoresolution.com to schedule your live demo or call us at 866-354-0300.
